Abdalla Ayman

Full Stack Engineer • Backend • DevOps

+201556681870 • abdallaaymanshandi3@gmail.com • github.com/abdalla-ayman • Giza, Egypt

PROFESSIONAL SUMMARY

Full Stack Engineer with 3+ years of experience building scalable web and mobile applications, RESTful APIs, and e-service platforms. Strong background in Node.js, NestJS, React.js, Next.js, React Native, and PostgreSQL, with hands-on CI/CD (GitHub Actions), Nginx/Ubuntu deployment, and payment gateway integration. Proficient in AI-assisted development (Claude Code) to accelerate delivery and improve code quality.

EXPERIENCE

Full Stack Developer
Nov. 2025 – Present

Qast · Remote

- Developed backend and frontend services using NestJS, Express.js, Next.js, and Tailwind CSS.
- Implemented centralized Single Sign-On (SSO) with Keycloak federated to Microsoft Entra ID, enabling Microsoft 365 login across Qast applications; deployed with Docker behind a Caddy reverse proxy.
- Integrated AI-assisted development workflows (Claude Code, Claude design tools, GitHub Copilot) to accelerate feature delivery, improve code reviews, and reduce bug rates.
- Designed and maintained RESTful APIs consumed by web clients.
- Collaborated with developers and designers in an Agile team environment.

Backend / DevOps Engineer
Dec. 2023 – Aug. 2025

Bunyan · Riyadh, Saudi Arabia (Remote)

- Led backend development of a project management and e-commerce platform.
- Designed and maintained scalable RESTful APIs using Node.js, Express, and PostgreSQL.
- Built and managed CI/CD pipelines using GitHub Actions for automated builds and deployments.
- Configured and maintained Ubuntu production servers with Nginx as web server and reverse proxy.

Full Stack Engineer
Jul. 2022 – Jul. 2023

Lux Rent · Riyadh, Saudi Arabia (Remote)

- Maintained and improved a car rental platform using Node.js, SQL, Vue.js, and EJS.
- Integrated a secure payment gateway ensuring PCI-compliant, smooth transactions.
- Enhanced admin dashboard features for rentals, shopping carts, and order management.
- Optimized EJS templates and SQL queries, improving page load times and system reliability.

PROJECTS

Founder, ENJAZ Tech Services — enjaz-tech.net

Studio helping small businesses and startups go digital: custom websites, mobile apps, API/system integrations, automation of manual workflows, and rescue & repair of broken or abandoned projects.

Sudanese Traffic Authority Apps — Personal Project

React Native mobile apps for Sudan's traffic authority, serving both citizens and police officers.

EDUCATION

Bachelor's in Information Technology
Khartoum, Sudan

University of Khartoum

TECHNICAL SKILLS

Languages	JavaScript • TypeScript • SQL • HTML • CSS • Java
Frameworks & Libraries	Express.js • NestJS • React.js • Next.js • React Native • Spring Boot • Tailwind CSS
Databases & Caching	PostgreSQL • MySQL • MongoDB • Redis • Sequelize
DevOps & Tools	Git • Docker • GitHub Actions (CI/CD) • Nginx • Ubuntu • Jira
API & Integration	RESTful APIs • Payment Gateway Integration • Keycloak • OAuth 2.0 / OIDC • Microsoft Entra ID
AI-Assisted Development	Claude Code • Claude design tools • GitHub Copilot • LLM-based code generation & review tools
Concepts	Agile/Scrum • Database Design • Performance Optimization • Security Best Practices
